CRIM: Per capita crime rate by town

ZN: Proportion of residential land zoned for lots over 25,000 sq. ft

INDUS: Proportion of non-retail business acres per town

CHAS: Charles River dummy variable (= 1 if tract bounds river; 0 otherwise)

NOX: Nitric oxide concentration (parts per 10 million)

RM: Average number of rooms per dwelling

AGE: Proportion of owner-occupied units built prior to 1940 **DIS:** Weighted distances to five Boston employment centers

RAD: Index of accessibility to radial highways **TAX:** Full-value property tax rate per \$10,000

PTRATIO: Pupil-teacher ratio by town

B: 1000(Bk — 0.63)², where Bk is the proportion of [people of African American descent] by town

LSTAT: Percentage of lower status of the population

Zero Correlation: When x and y are completely independent

Positive Correlation: When x and y go together

From the above graphs (Last Row), we can clearly see that the feature RM ans LSTAT has a positive correlation with Price.
